Recruitment Team

Capitec Bank

Dear Hiring Team,

I am writing this to show my sincere intention to apply for the Work Integrated Learning (WIL) program at Capitec Bank. As an aspiring applicant with a keen interest in Capitec Bank, I am currently in my third year of ICT (Application Development) at the Cape Peninsula University of Technology and I can gladly say that Capitec Bank is a service-oriented institution that is customer-centric.

During my academic career, I have learned to appreciate theory and its application as it relates to software development. I also have hands-on experience working on a number of projects and using applications of modern technologies. One of the most famous projects was GreenHub which is a web-based recycling education platform. It was built using a combination of PHP & MySQL for the database management and JavaScript, HTML and CSS were used for the Frontend along with exciting and engaging user experiences which were mandatory for the active participation of users at all levels from kids to adults. My participation in various projects has taught me to be more detail-oriented, improve my attention to detail, sharpen self-control, figure things out and even collaborate, all of which are skills and traits that I'd be glad to demonstrate in my working environment.

I was always impressed by Capitec's solutions in regards to uplifting innovation as well as supporting the community. It is for these reasons that I believe that I could learn many things. Through the innovative WIL program, I could also earn

a living and just maybe work for them someday, hence it will do wonders to my professional and personal growth.

I possess a clean crimes record, along with a credit record, and I am willing to devote myself completely to this position. I hope for the possibility to join an organization that appreciates service while simultaneously cultivating talent and diversity.

Thank you for considering my application. I am available for an interview at your convenience and look forward to the possibility of contributing to Capitec's mission.

Warm regards,

Relebohile Brightness Molefe
